AGRICULTURAL TRAILERS

4-Ton Double-Axle Tipping Trailer

About the product

Saygınlar Tarım Makineleri has been manufacturing trailers since 1984. With our factory in Afyon and our 27 employees, we serve farmers in Türkiye and abroad. We are one of Türkiye's largest manufacturers. Tractor trailers were the first product we made; we have kept building on them over the years and continue to produce tractor trailers, and today we manufacture around 12 types of agricultural machinery. Our trailers are made entirely from domestic parts and materials. Our trailers are CE and TSE certified. Our agricultural trailers and the SAYGINLAR name are among the leading brands. We also build custom trailers to order, to your requirements. We are at your service with custom-built agricultural trailers and utility trailers. Our spare parts and agricultural trailers are backed by the assurance of our brand. Our agricultural trailers can carry all kinds of material: wheat, barley, silage and manure. Our trailers are designed for all kinds of difficult terrain. A swivel drawbar helps prevent overturning. With 33 years of experience, we are here to do our very best for you. You will feel the quality in the high-quality tipping system and comfortable suspension. Wherever you are in Türkiye or the world, we will reach you and deliver our quality that stands the test of time.
