WATER AND FUEL TANKERS

1200-Litre Water Tanker

About the product

Founded in 1984 as a family business in a small workshop, SAYGINLAR began with the production of tractor cabs and trailers. Today it continues its activities by manufacturing nearly thirty types of products and by trading hundreds of products from the brands it represents.

Our company manufactures at its factory in the Afyonkarahisar Organised Industrial Zone, which has 3,000 m² of covered and 2,000 m² of open space, and sells through its store in Afyonkarahisar city centre. Most of our sales are domestic, thanks to our extensive dealer and service network, but we also export to more than 50 countries, including Kuwait, Azerbaijan and Iran.

Since the day it was founded, our company has followed the principle of QUALITY IN MANUFACTURING, ASSURANCE IN SALES. It also keeps up with innovations in its sector and, through the work of its R&D department, is expanding its product range with innovative products.
