SLURRY TANKERS

Liquid Manure Spreading Tanker – Slurry Tanker

About the product

Towed by a tractor and driven by the PTO shaft, it is compatible with every tractor and is manufactured in capacities of 6-10 tonnes. It is economical and needs no tractor unit or truck.

Applications:

It is a NEW MULTI-PURPOSE SLURRY TANKER that can be used for firefighting, road and agricultural irrigation, emptying septic tanks, and pumping up and spreading liquid manure on farms.

With our factory in Afyon and our 27 employees, we serve farmers in Türkiye and abroad. We are one of Türkiye's largest manufacturers. We have been manufacturing agricultural machinery for 33 years. With years of experience in agricultural machinery, we serve farmers in Türkiye and, through our exports to more than 11 countries, around the world. Our liquid manure tanker comes in 2 versions: 6 tonnes and 10 tonnes. You can spread your organic liquid manure safely with our liquid manure spreading tanker. During spreading you will feel the quality and high efficiency of our Liquid Manure Spreading Tanker. Our liquid manure tanker is made entirely from domestic materials. The 6-tonne liquid manure tanker is single-axle, while the 10-tonne liquid manure spreading tanker is double-axle. Our slurry tanker for pumping up and spreading liquid manure is designed for difficult terrain and weather conditions, with our farmers' convenience and productivity as the top priority. Liquid manure spreading tankers can also be custom-designed at our factory to suit the way you want to work, with components added or removed to order. Some of these options: top spraying, bottom spraying or soil injectors, designed according to your requirements. For high quality and high yields in your fields, a liquid manure spreading tanker will be your indispensable helper. Liquid manure tankers, modern farming's greatest helper, will make a major contribution to your yields.

Our company manufactures at its factory in the Afyonkarahisar Organised Industrial Zone, which has 3,000 m² of covered and 2,000 m² of open space, and sells through its store in Afyonkarahisar city centre. Most of our sales are domestic, thanks to our extensive dealer and service network, but we also export to countries such as Kuwait, Azerbaijan and Iran.

Our water tanker range comes in 3 types: water tanker trailers, fuel tankers, and stationary water and fuel tanks. You can choose the model with axles and use the water tanker as a mobile unit, or use it as a stationary tank. The tank can be used to store water, fuel, oil and chemicals. You can meet your water and diesel needs in any terrain and carry water and fuel from one place to another. Water tanker models range from 2 tonnes to 8 tonnes.

- Pump type: oil-lubricated vane
- Rotational speed: 540/1min
- Working width: 2-14 metres
- Transverse manure spreading: 14C/CV
- Speed: 4.5 km/h
